

Case of Operation

The *Platinum Elite's* new digital technology and enhanced features represent the "Platinum Standard" for ease of operation that will meet pulmonary function testing needs for years to come.

Focus on the patient, not the procedure

- One button testing
- Automatic gas calibration
- Self-adjusting analyzers
- Interactive performance messages

Complete Capabilities for Better Patient Care

- Faster and more accurate testing
- Diagnostics include Airways Resistance and Thoracic Gas Volumes
- Compliant with ATS/ERS and HIPAA standards
- Open architecture database with flexible system software
- Multiple networking and interfacing options to enhance data management and connectivity

Superior Patient Interface with the preVent™ Flow Sensor

- Simple snap-in design requires no warm-up or recalibration between patients
- No moving parts or electronics for maximum durability
- Can be sterilized, used with a filter or discarded, making it extremely versatile and cost effective
